

inTEC Online Backup

Is your organisation protected against critical data loss?

What is *inTEC Online Backup*?

inTEC Online Backup is a server and Microsoft 365 solution that safeguards critical data, prevents loss, and keeps your business running.

✓ File-Level Backup

Regularly protects files on servers, NAS, and workstations to prevent data loss.

✓ 365 Backup

Secures Mailbox, OneDrive, Teams, and SharePoint data for quick recovery.

✓ Virtual Machine Replication

Ensures fast recovery of Microsoft 365 security configurations

Service areas

✓ File-level backup (Server/NAS/Workstation)

Data stored in ISO 27001-certified UK centres with full resilience, dual power, and strict physical access control.

✓ 365 Mailbox/OneDrive/Teams/SharePoint backup

Data encrypted at source (256-bit), transferred via SSL, re-encrypted to 448-bit in secure UK data centres.

✓ Virtual machine replication

Altaro enables onsite and offsite VM backups with seeding for large data and NAS support for fast restores.

✓ Why backups matter

Protects against cyber-attacks, failures, and human error, ensuring compliance, reducing downtime, and keeping data recoverable.

What are the benefits of *inTEC Online Backup*?

Enhanced Data Security

Regular backups safeguard your data, with immutable remote storage preventing unauthorised access and deletion.

Customisable Retention Policies

Allows you to set customizable data retention policies to meet your specific business needs and compliance requirements.

Scalable Storage Management

Offers scalable storage options that can grow with your business, ensuring that you always have enough space for your backups.

Disaster Recovery

Provides a robust disaster recovery solution, allowing you to quickly restore your systems and data in the event of a catastrophic failure.

Data Integrity

Advanced data integrity checks are performed to ensure that the backed-up data is accurate and uncorrupted.

Automated Backups

Automated backup schedules, ensuring that your data is backed up regularly without manual intervention.

Quick Recovery

Ensures that data can be restored quickly, minimising downtime and disruption.

Cost-Effective

Provides a cost-effective solution for data protection with transparent pricing.

Encryption

Ensures that your data is encrypted both in transit and at rest, providing an additional layer of security.

Cost Savings

Reduces the need for expensive on-premises backup infrastructure, leading to significant cost savings.
