

Phishing Tackle

How robust is your team's cyber security awareness against possible attacks?

What is *Phishing*?

Phishing is when attackers impersonate trusted sources via emails, texts, or websites to steal sensitive data. It causes 36% of all breaches.

What is a *Phishing Simulation & Phishing Tackle*?

✓ Phishing Simulation

Simulates real-world phishing attacks and trains employees to spot threats - boosting awareness, reducing risk, and improving cyber resilience.

✓ Phishing Tackle

A platform providing phishing simulations, awareness training, and reporting tools - helping organisations build a strong security culture.

What are the key features of *Phishing Tackle*?

✓ Phishing Simulation

- Customisable, automated phishing campaigns
- Real-time reporting on employee behaviour

✓ Cybersecurity Awareness Training

- Interactive modules & quizzes
- PhishNET tool for reporting suspicious emails

✓ User Management

- Role-based access control
- Bulk enrolment with AD integration

✓ Analytics and Reporting

- Dashboards and compliance reports
- Behavioural insights to track progress

✓ Integration and Automation

- Works with existing IT systems
- Auto-assign remedial training on failures
